Allowable Subject Matter

1. Claims 26-43 are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance: The prior art of record (Trumbull and Bridger) fails to teach an apparatus and a method for interfacing with a connector, comprising an RJ-11 port to receive an RJ-11 connector from end user equipment or a telephone network; a detection circuit to automatically detect whether the RJ-11 port receives an RJ-11 connector from end user equipment or from a telephone network; and a control circuit to automatically configure the RJ-11 port to interface to the end user equipment in response to detecting that the port receives an RJ-11 connector from the end user equipment or to interface to the telephone network in response to detecting that the port receives an RJ-11 connector from the telephone network, as described and connected in independent claims 26 and 35. These limitations, in combination with the remaining limitations of claims 26 and 35, are not taught nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
